

Editorial Note

Dear Readers, Contributors and Colleagues,

We are pleased to announce that Volume 29, Issue 2, of the Burapha Science Journal is now available online, covering the period from May to August 2024. This edition features a total of 25 articles, with an impressive 84% coming from external submissions. The field of Biological Sciences (including Biology, Microbiology, and Biochemistry) leads this issue with 6 articles (24%). Chemistry is gaining momentum with 5 articles (20%), followed by Food Science with 4 articles (16%). Additionally, the fields of Marine Science, Environmental Science, and Geoinformatics are each represented by 3 articles (12%). We are also pleased to include one article in the field of Statistics.

This issue showcases research from a wide array of scientific disciplines, including biological sciences, physical sciences, technology, and applied sciences. However, we note the absence of articles in the fields of Physics, Mathematics, and Informatics. We encourage authors working in these areas, as well as other fields within our journal's scope, to submit their work for future publication in the Burapha Science Journal.

We extend our heartfelt thanks to our contributors, reviewers, and editorial team for their unwavering dedication to maintaining the high standards and diversity of research in this volume. Your commitment is essential to the continued success of the Burapha Science Journal. Our journal remains committed to improving its quality and aims to achieve inclusion in international indexing databases. This ambitious goal requires the ongoing support of our contributors, with special recognition given to our diligent editorial board. Their perseverance and dedication have been instrumental in our progress, and we express our sincere gratitude for their invaluable contributions.

Best regards,

Sutin Kingtong, Ph.D.

Editor-in-Chief
